

IN THE DRAWINGS:

Please amend Figure 1A as indicated in the attached Request for Approval of Drawing Changes.

REMARKS

Applicants have amended the application to include a Sequence Listing in accordance with 37 C.F.R. §§ 1.821 - 1.825. Applicants have also corrected omissions of Sequence Identifiers on pages 7, 19, 20, and 21, and in Figure 1A. No new matter is added by these amendments.

Applicants respectfully submit that the amendment to page 16, line 25, simply corrects a typographical error in the specification in reference to a patent number. It is submitted that the reference in the specification to the subject matter ("immunization methods") of the referenced patent, and to the inventors ("Robinson et al."), makes clear that the referenced patent is, in fact, 5,643,578 and not some other patent. In support of this submission, Applicants attach hereto lists of patents which correspond to U.S. Patent Numbers 5,*43,578 and 5,43*578, where * is any number from 0 to 9. As can be seen from the attached lists, only U.S. Patent No. 5,643,578 lists the inventor as Robinson et al., and is directed to "immunization." Therefore, Applicants submit that no new matter is added by this amendment.

A copy of the Sequence Listing in computer readable form is also attached, accompanied by a verified statement that the paper and computer readable copies of the Sequence Listing are the same and that no new matter has been added to the
